BOOST-52

0:52:34
(Mono Potassium Phosphate)

Phosphorus	Potassium
52 %	34 %
Water soluble	Water soluble

- As a nitrogen-free fertilizer, Jai Kisan Boost is the preferred source of phosphorus and potassium when nitrogen fertilization should be limited
- Ideal for application at reproductive (flowering and fruit setting) stage of fruit crops. This increases flowering and the sugar content of the fruits
- Reduces premature dropping of flowers and fruit shedding
- Maintains mineral and water balance in the plant
- Improves photosynthesis, activates several enzymes and energy transfer

Dosage:

Fertigation : 1 to 3 kg per acre.

Foliar application : 5 gm per litre of water.

2 to 3 sprays at an interval of 10 days.

Available in 1, 10 and 25 kg bags.
